

The Researcher's Mobility Portal Austria

Mobility Centres

- Proximity assistance for researchers and their families

- Mobility Centres serve as local contact points for organizations and researchers
- Proximity assistance provides organizations and researchers with local, customized Help Desk functions
- National network ensures transparent access to corresponding experts

Austrian Research Landscape

- Information about research activities in Austria

- Provides a wide scope of research institutions and activities across Austria
- Encourages cooperation among national/international initiatives

Women and Science

- Information tailor-made for female researchers

- Contributes to the promotion of women in scientific research
- Provides strategic information, particular activities as well as other resources and databases

The Researcher's Mobility Portal Austria

Welcome to the Researcher's Mobility Portal, a joint initiative of the Austrian Federal Ministry of Education, Science and Culture (bm:bwk), in cooperation with other ministries, the Austrian Exchange Service (ÖAD), the Bureau for International Research and Technology Cooperation (BIT) as well as numerous universities, organisations and research institutions across Austria.

The Austrian Researcher's Mobility Portal further represents a national extension of the pan-European Researcher's Mobility Portal stemming from the European Commission and the 33 countries participating in the European Union's Sixth Framework Programme for Research.

The purpose of this Portal is to create a more favourable environment for career development opportunities for researchers by providing the necessary structured information as proposed in the Communication "A Mobility Strategy for the European Research Area"*.
